MASTER PLAN
AND
INVENTORY OF PROGRAMS
FOR THE
CALIFORNIA COMMUNITY COLLEGES
REVISED SPRING 1974

Chancellor's Office
California Community Colleges
1530 Capitol Avenue
Sacramento, California

This book was designed to aid the Community Colleges, other educational institutions and agencies, and the general public in locating programs in both academic and vocational disciplines offered in California Community Colleges. It is an outgrowth of Title 5 regulations (Division 6, Part VI, Chapter 5) of the California Administrative Code. These regulations require each Community College to submit an educational master plan to the Chancellor's Office and to update it annually. As a means of providing up-to-date assistance to those who use it, the Master Plan and Inventory of Programs will be published periodically.

Sidney W. Brossman
Chancellor

FOREWORD

The first Master Plan and Inventory of Programs for California Community Colleges was published in 1972. That document reflected those educational programs which were in operation during the 1970-71 academic year. Information about those programs was obtained by surveying all California Community Colleges to determine which programs were actually operational during that year. The survey revealed that there were 300 different programs being offered in 1970-71. The grand total of all programs offered in all California Community Colleges was slightly under 6000. The number and distribution of those programs according to major Classification of Instructional Disciplines (CID) is shown on the following page.

Since November 23, 1970, all California Community Colleges have been required to obtain approval from the Community College Chancellor's Office before an educational program can be offered. The number of programs approved in the 1971-72, 1972-73, and 1973-74 academic years are also shown in the table on the following page. All of these approved programs as well as all of the programs in operation prior to November 23, 1970 are reflected in the current Master Plan and Inventory of Programs. In addition, programs which are expected to become operational at some specified future date are included.

The compilation of information and the editorial details for a document of this type require the work of many persons. In this case, we are indebted to Dr. Clarence Mangham, Janice Murphy and Donna Thomas for their dedication in completing this task.

Raymond J. Pitts, Dean
Academic Affairs

Gerald D. Cresci, Dean
Program Planning
Occupational Education
